First Aids & Emergency for Nurses

Author: Melanie Jeske

- **ISBN:** 9789394314566
- **Price:** ₹ 200/-
- **Size:** 23*36/16
- **Edition:** Paperback
- **Medium:** English
- **Weight:** 213 grams
- **Category:** Nursing
- **Content:** N/A [CLICK HERE](#)
- **Sample Chapter:** N/A [CLICK HERE](#)

Description: First aid means preserving the life of an unconscious or injured person. This means that a person takes an executive first measure to save a human life. The central task is to avert or eliminate threatening dangers and health disorders until professional help arrives. The aim is to stabilize the condition of the injured or unconscious person until professional help takes over. Care must be taken to eliminate possible hazards, such as fast-moving cars, fire, explosions, floods, and contaminated blood, to themselves and others. This means that the person who arrives first at the scene of the accident/incident must provide first aid, according to their level of knowledge. This includes, in particular, making an emergency call, securing the accident site/incident, and caring for the injured.

A Textbook of First Aid

Author: Ambika Kanwar

- **ISBN:** 9789394875234
- **Price:** ₹ 350/-
- **Size:** 23*36/16
- **Edition:** Paperback
- **Medium:** English
- **Weight:** 408 grams
- **Category:** Nursing
- **Content:** N/A [CLICK HERE](#)
- **Sample Chapter:** N/A [CLICK HERE](#)

Description: At every stage of your life Wherever you go or work, if an accident happens in your workplace, you don't want to become a helpless witness. That's why it's crucial to have at least a basic knowledge of first aid and have access to essential first aid supplies so you can deal with any potential accidents in a controlled and measured manner. An early response can increase the likelihood of a favourable outcome in an emergency. It is important to help the victim as much as possible, but early notification to the proper medical professionals in your community will ensure the best outcome for any victim. Remember to always ensure scene safety and call emergency, when necessary, before assisting a victim. First Aid skills can be applied in the home, the workplace or in public locations, therefore the more First Aid-certified people there are in a community the safer that community becomes. This book provides basic information on First Aid, the basics of managing emergency situations and about their First aid. I hope the content of the book will provide clarity in concepts to students.

First Aid in Emergencies Care

Author: Kiranbir Kaur

- **ISBN:** 9789394314061
- **Price:** ₹ 300/-
- **Size:** 20*30
- **Edition:** Paperback
- **Medium:** English
- **Weight:** 403 grams
- **Category:** Nursing
- **Content:** N/A [CLICK HERE](#)
- **Sample Chapter:** N/A [CLICK HERE](#)

Description: As we all know that first aid is the initial care given to the casualty at the time of any incident either at home, school, community, or workplace to prevent further damage and deterioration. The first aid given in the initial hours helps to prevent the severity and future complications if given properly. Emergencies can happen anywhere and anytime all of a sudden. So, in today's scenario, it becomes necessary for nursing students to acquire and update their first aid skills to provide better care both in hospital and community settings based on scientific rules and the latest guidelines. The current book has been designed as an introductory textbook for first aid skills and emergency care for undergraduate nursing students as per the revised curriculum provided by the Indian nursing council. The outline of the chapters has been done by keeping learning objectives in the mind. The language is kept as simple as possible to make concepts understandable for students. The content of the book is divided into 11 units according to our body systems. The first 2 chapters provide basic information about first aid and emergency care. Chapters 3-10 start with the anatomy and physiology of the respective body system and end with exercises for self-evaluation. The content of the book is referred from various latest books and modules related to first aid from Indian and foreign authors, and research articles published in the national and international journals in order to provide updated material. The 11 chapters deal with emergency care in different settings. The topic of first aid in COVID-19 is also included to understand the difficulties faced by first aiders in the time of pandemic and guidelines to be followed to provide first aid.

Description: Nurses are the frontline fighters in the battle for the health and wellness of society. They are the backbone of the health care delivery system at all levels, rural or urban communities, hospitals, clinics or industries. Community Health Nursing is a multidisciplinary, rapidly growing subject. The primary objective of community health nursing is to help people attain optimal health through a healthy lifestyle. Sound basic knowledge of community health nursing will help nursing students assess the community's health problems and take appropriate action at the grass root level. The community health nurse needs to know about the community, its social and cultural patterns, principles of community health nursing, community diagnosis, community development, expanded health programs and roles and responsibilities of community health nurse in shaping the health-seeking behaviour of the community. I am immensely pleased to present this book titled "Textbook of Community Health Nursing-I for GNM Nursing Students". This book is useful not only for students but also for educators. It is written in simple language according to the new syllabus of GNM prescribed by the Indian Nursing Council for Community Health Nursing-I. This book will meet the student's requirements and help strengthen their basic knowledge of the subject so that they can become better equipped to provide primary health care to the community, thus keeping the commitment of the country to achieve "Health for All." I invite constructive comments and suggestions from students, teachers and experts for improving this book in future editions

Description: Easy English grammar Stands tall on the five pillars of the English language parts of speech, sentence structure, tense vocabulary and composition. The simulation-based approach of the word wallet is to tickle the imaginative mind of the young learner. The structure-based approach of the sack and tense tank tackles the 'hows' and 'whys' of the language. The remaining two parts of the book, our plan for expansion and application after concepts of English grammar already formed (through the five three parts of the book) it, follow the illustration and usage-based approach in the vocabulary-based and writer world; the purpose here is to Ignite the mind of the new age. All the above communication and structural parts of the English language together give a holistic approach to learning the language naturally, gradually, and graded manner.

Description: Today, the current era where kids use computer devices smoothly is the era of computer education. Computer Education plays a vital role in everyone's lives right from beginning to end. The computer has become a standard of education across the globe, which improves performing various research skills, helps in getting jobs around the world, and overall, it helps to enhance technology. This textbook on computer Education is based on the syllabus of the Indian Nursing council for students of Nursing. The textbook is organised with very simple and clear ideas making the student understand quickly and easily. There are a total of four units, and each unit comprises its section and subsection as per the syllabus. Unit 1 covers the introduction to computer and disk operating systems, which includes structure, parts of a computer, DOS and the uses of computers in health care delivery systems. Unit 2 describes MS office, which is divided into a subsection of MS Word, MS Excel with the pictorial presentation, MS PowerPoint, MS access, MS Publisher, MS OneNote and MS Outlook. Unit 3 is devoted to Multimedia, its types and uses, and computer-aided teaching and testing, which is now acting as a useful device across the globe. Unit 4 comprises the use of the internet and e-mail; a clear explanation is given in accessing the website, searching the website and using the internet in communication programs.

Description: Nursing education is an essential part of the nursing curriculum as it is designed to provide students with the knowledge and skills necessary to deliver high-quality patient care. Nursing is a complex profession that requires a strong theoretical and practical foundation. In this book, I tried to include five primary modules that attempted to cover as many aspects of nursing education topics as possible. The book is written in accordance with the syllabus and goes from providing students with a fundamental knowledge of what education is to help them understand the underlying meaning of nursing education as a subject. The book contains technical knowledge about the subject. It implies that through seeking knowledge and implementing science, we can live happy and meaningful lives. Through this book, I hope to help nursing students comprehend the value of nursing education and strive to study more and better understand the world around them. And by doing so, we can improve our quality of life while also contributing to the advancement of humanity.

Description: Nursing research tremendously influences current and future professional nursing practice, thus rendering it an essential component of the educational process. This article chronicles the learning experiences of two undergraduate nursing students who were allowed to become team members in a study funded by the National Institute of Nursing Research. The application process, the various learning opportunities and responsibilities performed by the students, and the benefits and outcomes of the experience are described. The authors hope that by sharing their learning experiences, more students will be given similar opportunities using the strategies presented in this article. Nursing research is critical to the nursing profession and is necessary for continuing advancements that promote optimal nursing care.

- **Sample Chapter:** N/A [CLICK HERE](#)

Description: The book titled "Textbook on Professional Trends and Adjustments in Nursing for General Nursing and Midwifery (GNM)" reconnoitre various legal and ethical issues of the nursing profession that should be adapted and taught by the nursing students on their nursing voyage. The nurse carries personal responsibility and accountability for nursing practice and maintains competence through continual learning. The nurse maintains a standard of personal health such that the ability to provide care is not compromised. The nurse uses judgement regarding individual competence when accepting and delegating responsibility. The nurse always maintains standards of personal conduct which reflect well on the profession and enhance public confidence. The nurse, in providing care, ensures that the use of technology and scientific advances are compatible with the safety, dignity and rights of people. The nurse assumes the major role in determining and implementing acceptable clinical nursing practice standards, management, research and education. The nurse is active in developing a core of research-based professional knowledge. The nurse, acting through the professional organisation, creates and maintains safe, equitable social and economic working conditions in nursing.

Communicative English for B.Sc Nursing Students

Author: Keerat Kaundal

- **ISBN:** 9789394875340
- **Price:** ₹ 275/-
- **Size:** 20*30
- **Edition:** Paperback
- **Medium:** English
- **Weight:** 318 grams
- **Category:** Nursing
- **Content:** N/A [CLICK HERE](#)
- **Sample Chapter:** N/A [CLICK HERE](#)

Description: This course on Communicative English helps students to develop their English skill drastically. It tells them all about communicative skills, focusing on the healthcare sector and professional development. It teaches vocabulary, pronunciation, grammar, paraphrasing, voice modulation, pauses, silence, spelling and other English skills. It helps students learn and practice their verbal and written English as a professional looking to empathize with future patients and being able to convey their intentions and communicate with future superiors. The book contains context along with suitable examples and methods to apply the given context in day-to-day life; including how to read and analyse situations and apply critical thinking strategies to be able to communicate properly. The book also teaches readers how to enhance their writing skills and teaches them how to be expressive. It teaches ways to apply LSRW (Listening, Speaking, Reading and Writing) skills in a way that allows the reader to learn, teach, educate, and share information, ideas and results with others.

A Textbook of Applied Sociology for B.Sc Nursing Students

Author: Supriya Swain

- **ISBN:** 9789392019401
- **Price:** ₹ 250/-
- **Size:** 20*30
- **Edition:** Paperback
- **Medium:** English
- **Weight:** 358 grams
- **Category:** Nursing
- **Content:** N/A [CLICK HERE](#)
- **Sample Chapter:** N/A [CLICK HERE](#)

Description: Applied Sociology is a course that teaches students about the various social needs of their sick patients. These can include life problems, culture, social organization or disorganization, family and marriage, etc... It's important to know how to help and assist ailing patients according to the kinds of issues they might be facing during their stay at the hospital. It teaches about various modern practices and how things like culture may not agree with some practices that might actually be very crucial for the treatment of a patient. It teaches students how to convey such information to the family of the patients without disrupting the social organization of the situation. Sociology is a social science that focuses on society, human social behaviour, patterns of social relationships, social interaction, and aspects of culture associated with everyday life; and Applied Sociology teaches students about it and how to handle and apply their sociological knowledge into real life circumstances.

Description: Children are the future of every nation across the world. It is today's generation which can go ahead and make the world a better place. If today's children are healthy, it can lead to a much healthier future. Children are vital to the nation's present and its future. Parents, grandparents, aunts, and uncles are usually committed to providing every advantage possible to the children in their families, and to ensuring that they are healthy and have the opportunities that they need to fulfil their potential. Yet communities vary considerably in their commitment to the collective health of children and in the resources that they make available to meet children's needs. This is reflected in the ways in which communities address their collective commitment to children, specifically to their health. The pharmacokinetics of many drugs are different in children compared to adults. The pharmacokinetic processes of absorption, distribution, metabolism and excretion undergo changes due to growth and development. Finding the correct doses for children is complicated by a lack of pharmacokinetic studies. Children's doses cannot always be extrapolated directly from adult studies. Many paediatric doses are based on the child's age or weight. These may need adjustment depending on the child and the clinical response. It is important to check dose calculations. The calculated childhood dose should not usually exceed the adult dose. Different medications must be absorbed to be effective. For absorption, the drug must be administered in proper manner. To choose a route of administration we need to relate the dosage form, the advantages and disadvantages etc. Drug is essential for everyone. Nurses play a vital role in the hospital sectors and different areas. This book will be of immense use to nursing students and practitioners to effectively manage and gain the knowledge. This drug book is organized in different system.

Description: Pharmaceutics is the science of designing dosage forms which deals with the process of converting old drugs or new drug entities into safe and effective dosage forms. This book is a student-friendly and concise book that introduces the readers to various dosage forms and provides an in-depth knowledge about the process involved in formulation of those dosage forms, where special attention is given to powders, tablets, capsules and vaccines. We have tried to add the latest information available on the topics mentioned in the syllabus. The subject pharmaceutics plays an important role in modern pharmacy because it provides all the basic information required to formulate medications such as, calculations, measurements, process of manufacturing a medication dosage form, drug extraction, purification, sterilisation and their packaging. Basically, the book provides knowledge about the processes involved from extraction of crude drug till storage and packaging of the drug. The chapters are concise and to the point with flowcharts, tables, pictures and diagrams for better understanding of the topics. The book also contains a glossary of important terminologies and key words at the end. The information provided in this book will act as a guide and essential resource for students in the field of pharmacy, clinical pharmacy, pharmaceutical engineering, quality assurance, research and development. Pharmaceutics being an essential and vast subject is divided in two parts and this book contains only one part.

- **Weight:** 292 grams
- **Category:** Nursing
- **Content:** N/A [CLICK HERE](#)
- **Sample Chapter:** N/A [CLICK HERE](#)

Description: Pharmacognosy is a highly inter-disciplinary science involving various subjects but quite closely related to botany. This book provides in-depth knowledge about natural sources of drugs, their chemical and pharmacological properties, and their applications. It emphasizes on basic principles of traditional medicines and their association to current drug development. The book will help students, as well as readers, understand various aspects such as the history and scope of pharmacognosy, different sources of drugs and its classification, drug adulteration, identification tests of drugs, and different therapeutic areas where drugs of natural origin play a vital role and have been used extensively by health care practitioners. Pharmacognosy occupies an important place in modern pharmacy as it deals with collection, identification, microscopy, preparation, and methods of extraction of active constituents from plants. All those who desire to know the significance and application of plants in the herbal drug industry may find this book quite informative and useful. The concept of this book is a critical resource for students in the fields of pharmacognosy, pharmacy, biotechnology, bioanalytical science, botany, herbal sciences, and life sciences. We earnestly believe that my sincere efforts in compiling the vast knowledge of pharmacognosy have been congregated in the form of well-structured, concise chapters with figures and tables wherever necessary, and will be beneficial to the students.

Description: The Covid19 Pandemic has once again reminded us of the need and importance of 'Public Health and Community Medicine'. In these trying times, compiling our first edition of the textbook on Health Education and Community Pharmacy has been an immense pleasure and a ray of hope. The book is designed, keeping in mind the national syllabus for students of diploma in pharmacy in various institutions of India. Apart from theoretical knowledge, the subject of Health Education and Community Pharmacy has its application in practical life ranging from a holistic approach to health, prevention of diseases, first aid to family planning and demography. It broadens the scope of healthcare, taking into account every aspect in the environment and the actions of man and microorganisms that affect human health. India is in a dire need of upgrading its Public Health System and the shoulders of the younger generation have a responsibility to apply their knowledge for the welfare of the Public Health. Keeping in mind the need of the hour, sincere efforts have been put forth to simplify the concepts of Health Education and Community Pharmacy in a concise and comprehensive manner. With extensive research, topics and contents relevant to the students of diploma in pharmacy have been covered in this textbook, as per the syllabus. Tables, flow- charts and pictures have been used adequately for the better understanding of students. We hope this textbook will be found resourceful and valuable to all students of diploma in pharmacy. May the quest of the knowledge on Health Education and Community Pharmacy, lead students to read this textbook and delve into the subject furthermore. Thus, proving to be beneficial for their education and professional life.

Description: Medical Pharmacology is a mixture of basics in pharmacology and clinical pharmacology, which has routes in pharmacotherapeutics. It is a dynamic subject that furnishes the doctor with the required knowledge and skills to prescribe drugs and evaluate medication therapy to maintain health and alleviate diseases. There are advancements in the medical field happening every minute, from molecular biology to targeted drug therapies, as well as in understating the pathology and physiology of the disease progression. A physician today needs to amalgamate new drug information and how to use an old drug in a better way to have the best possible patient outcomes. In an era where technology keeps advancing, everyone involved in patient care, from prescribing drugs (doctors) to evaluating, administering, and monitoring the patient (healthcare professionals- nurses and pharmacists), must keep themselves up-to-date about evidence-based medicine. Keeping this in mind, the "Textbook of Pharmacology" has been outlined to provide comprehensive and dependable information. One of the primary objectives of this book is to delineate important information about drugs. The book is curated specially for Diploma students concerning the syllabus provided by the Pharmacy Council of India (PCI). The opening section in each chapter talks briefly about the sub-sections included in that chapter. There are clear-cut guidelines provided in the book based on the current approach to therapy. Simple, self-explanatory, original tables, images and flowcharts have been demonstrated for a better understanding. This book will provide a better understanding of pharmacology.

Description: Community Pharmacy is the place where most pharmacists practice the profession of pharmacy. It consists of a retail storefront with a dispensary where medicines are stored and dispensed. Community Pharmacy offers various functions, including Providing health information to patients and the public, Prescription handling, Patient counselling, Patient medication record, Pharmacy administration, and compounding. This book has been written with the idea of introducing different aspects and fundamentals of the subject of Community Pharmacy and Management to students of diploma level. This book contains all the important parameters that need to be considered before and during patient counselling and treatment. The contents of the book have been designed in accordance with the latest revised syllabus of the Pharmacy Council of India for D. Pharm Second Year Students. This book consists of 10 Chapters. The book covers prescription handling with good dispensing practices, patient counselling, communication skill, over-the-counter medications, and various health screening services in community pharmacies with community pharmacy management. We realize that this book will fulfil the course objective like professional handling and filling prescriptions, patient counselling on diseases and minor ailments, patient counselling on prescription and/or non-prescription drugs, preparation of counselling materials such as patient information leaflets, and performing basic health screening tests. In compiling this book, we have consulted several books, journals, and other regulatory materials, and we express our indebtedness to those authors, publishers, and regulatory officials. This book has been written to provide theoretical information in an operational manner about procedures, techniques, and methods used to maintain the management and dignity of the community pharmacist.

Description: "A Textbook of Biochemistry and Clinical Pathology" designed as per the syllabus prescribed for the Diploma in Pharmacy students, belonging to various institutions in India. We believe that the flow of knowledge should be never-ending. The things we know should be passed on to others. We aim to make the subject lucid for exam-going students by explaining the topics in the syllabus in a clear, detailed and accurate manner. Each concept in the book is accompanied by point-by-point discussions and easy definitions to understand the different concepts. Additionally, we have placed questions at the end of each chapter to practice and evaluate the extent of learning. We have tried our best to share our experience and knowledge accurately in the book and hope that our efforts will be fruitful for the learners. We earnestly believe that our sincere efforts in compiling the vast knowledge of biochemistry and clinical pathology have been congregated in the form of well-structured, concise chapters with figures and tables wherever necessary, and will be beneficial to the students.

A Textbook of Pharmacy Law & Ethics

Author: Dr. Rachita NG. , Mrs. Swati Singh & Mrs. Marjita Chakma

- **ISBN:** 9789394875241
- **Price:** ₹ 350/-
- **Size:** 23*36/16
- **Edition:** Paperback
- **Medium:** English
- **Weight:** 277 grams
- **Category:** Nursing
- **Content:** N/A [CLICK HERE](#)
- **Sample Chapter:** N/A [CLICK HERE](#)

Description: Jurisprudence is the study of fundamental legal principles including the knowledge of Law. In technical sense it is the science of the first principles of civil laws. Forensic pharmacy (pharmaceutical jurisprudence) Forensic in Latin means a public place, market place or place of assembly for judicial and other business. Some time back, the pharmacy profession was fully controlled in England by Pharmaceutical society of Great Britain and in USA by state laws. The laws in India during this era had superficial references to drugs and medicines. Later in order to control the indiscriminate use of medicines and to legislate the standardization of the preparations and sale of drugs, Government of India in the late Department of Education, Health and Lands, appointed a Drug Enquiry Committee in 1927. Since then, many Acts and Laws came into force with various objectives to be met with, in order to control completely the use of drugs in India. "Though several books are available on the subject, the material in most of them is presented in a diffused form or is highly specialized and discernible to those proficient in the field. This book builds self-confidence in student which helps to get success in the examination. This book has been written to meet the requirements of students of Diploma in Pharmacy in accordance with the new revised syllabus ER-2020 prescribed by Pharmacy Council of India. "The language and style of this book has been kept simple and lucid to help students to grasp the subject easily. Exhaustive revision questions have been given at the end of each chapter to enable the student to test his comprehension of the subject himself. "It is hoped that this book will be well received both by teacher and student."

Description: This textbook is designed for the undergraduate students of pharmacy. However, more than the required information has been discussed in some topics, for the sake of completeness. The authors have tried to present the subject from the fundamentals so that the reader can understand the theory and the connected concepts easily. The subject coverage is compressive enough from the view point of the student. Whenever possible, the diagrams are simplified to enable the students to reproduce with ease. The authors do not claim originality of the materials presented in this book. The authors have taken assistance in preparing this text from large number of text books by different authors. I acknowledge my indebtedness to these authors. Despite the best efforts put in, some unintentional errors might have eluded. Acknowledgment with great gratitude will be accepted if pointed out. Any suggestions from students and colleagues for the improvement in the future editions of this book are welcome.

- **Edition:** Paperback
- **Medium:** English
- **Weight:** 428 grams
- **Category:** Nursing
- **Content:** N/A [CLICK HERE](#)
- **Sample Chapter:** N/A [CLICK HERE](#)

Description: Validation and qualification of analytical methods and equipment are required by many regulations, quality standards, regulatory guidance documents, and company policies. If executed correctly, they help to improve the reliability, consistency, and accuracy of analytical data. This book, Drug Regulatory Affairs and Validation guides analysts, laboratory managers, quality assurance managers, and validation professionals through the validation and qualification processes in analytical laboratories. The validation and qualification procedures help to ensure compliance and quality, but with minimal extra cost and administrative complexity. The recommendations are complementary rather than contradictory to any regulations, standards, or official guidelines. They are based mainly on common sense and can be used in cases where information from official guidelines and standards is insufficient for day-to-day work. This book addresses international and national regulations and quality standards. Its concept, examples, operating procedures and templates are based on my more than twenty years of multinational experience, and incorporate all aspects of validation in use at the top companies in these fields. Input has been taken from personal discussions with managers, chemists at laboratories, corporate quality assurance managers, quality control managers, and vendors of equipment and chemicals. This book will learn how to speed up their validation and qualification processes, to avoiding troublesome, costly, reworking, and gaining confidence for audits and inspections. Readers are encouraged me to submit their comments and suggestions, especially if their experiences have been different in daily laboratory work.

Pharmaceutical Computer Application

Author: Kaushal K. Chandrul, Dr. B. Srivastava & Mrs. Bharti Chandrul

- **ISBN:** N/A
- **Price:** ₹ 300/-
- **Size:** 20*30
- **Edition:** Paperback
- **Medium:** English
- **Weight:** 562 grams
- **Category:** Nursing
- **Content:** N/A [CLICK HERE](#)
- **Sample Chapter:** N/A [CLICK HERE](#)

Description: The course in pharmaceutical computer applications retains a place in the undergraduate curriculum, despite its apparent inutility to the practicing pharmacist, for two reasons. The pharmacist is an expert on drugs, and an important aspect of the development, production, distribution, and use of drugs. This component of the pharmacist's professional field should be revealed to the student. Another reason is that much of the subject matter of pharmaceutical computer applications is fundamental to techniques and results of other fields in the curriculum, such as biochemistry, medicinal chemistry, and pharmaceuticals. This is a preparatory or service function of the course. In this book we try to give a systematic and detailed account of pharmaceutical computer applications to permit the pharmacy student and the pharmacist to understand most analyses in principle and many of them in detail. The material in this book enables the student to approach with computer application understanding the official compendia, reference works in specialized monographs and advanced text books in related subject. On the other hand, this is not a catalog nor is it a commentary on the official volumes. It is a text book.

A Textbook of Operation Theatre (Tech. & Manag.)

Author: Dr. Gitesh Amrohit

- **ISBN:** 9789392019067
- **Price:** ₹ 500/-
- **Size:** 20*30
- **Edition:** Paperback
- **Medium:** English
- **Weight:** 786 grams
- **Category:** Nursing
- **Content:** N/A [CLICK HERE](#)
- **Sample Chapter:** N/A [CLICK HERE](#)

Description: It gives me great pleasure to introduce this book on A Handbook for Operation Theatre. In this book, I have tried to solve the difficulty of students to understand the tests and getting the exact data. The aims and objectives of this book are primarily to meet the requirements of DMLT and undergraduate's courses. A Handbook for Paramedical science is an essential subject of Operation Theatre, but there is non-availability of good books on this subject. The books available are vast and mainly written for medical, dental, physiotherapy, nursing students. I have tried to overcome this problem by writing in easy language, point-wise manner, diagrams, flow chart, tables, graphs, pictures and providing exact data. I hope that this book will satisfy the needs of SMLT students. This book comprises units. All units such as pathology, microbiology, parasitology, haematology, blood banking incorporate fundamental aspects of knowledge and methods of learning practical pathology. Anatomy, physiology, biochemistry, computer, English, entrepreneurship and environment section are other attraction of this book. Finally, we can say, this book is based upon the Operation Theatre of the various paramedical state councils.
